

# Operator's Manual GT-225SF Grass Trimmer

The engine exhaust from this product contains chemicals known to the State of California to cause cancer, birth defects, or other reproductive harm.

Read and understand all provided literature before use. Failure to do so could result in serious injury.

Note: This product complies with CAN ICES-2/NMB-2.

### INTRODUCTION

Specifications, descriptions, and illustrative material in this literature are as accurate as possible. Specifications are subject to change without notice. Illustrations might include optional equipment and accessories, and might not include all standard equipment. Your equipment might appear slightly different than pictured equipment.

Read and understand all provided literature. Literature contains specifications and information for safety, operation, maintenance, storage, and assembly specific to this product. Scan QR codes for more information.

For additional literature, including safety manuals where applicable, or questions regarding terms used in this manual, visit:

https://www.echo-usa.com/manuals

OR

https://www.shindaiwa-usa.com/manuals

### SERVICING INFORMATION

### SERVICING INFORMATION

#### Parts and Serial Number

Genuine ECHO parts and assemblies for your ECHO products are available only from an Authorized ECHO Dealer. When you do need to buy parts, always have the model number and serial number of the unit with you. For future reference write them in the space provided below.

Model No. \_\_\_\_\_

Serial No.

### Service

Service of this product during the warranty period must be performed by an Authorized ECHO Service Dealer. For the name and address of the Authorized ECHO Service Dealer nearest you, ask your retailer or call: 1-800-432-ECHO (3246). Dealer information is also available on our Web Site www.echo-usa.com. When presenting your unit for Warranty service/ repairs, proof of purchase is required.

### **ECHO Consumer Product Support**

If you require assistance or have questions concerning the application, operation, or maintenance of this product, call the ECHO Consumer Product Support Department at 1-800-432-ECHO (3246) from 8:00 a.m. to 5:00 p.m. (Central Standard Time) Monday through Friday. Before calling, please know the model and serial number of your unit.

### **Product Registration**

Register your ECHO equipment online at www.echo-usa.com or by filling out the product registration sheet included in this manual. Registering your product confirms warranty coverage and provides a direct link to ECHO if we find it necessary to contact you.

### Additional Literature

4

In addition to finding information online, information is available from your Authorized ECHO Service Dealer, or by contacting ECHO Incorporated, 400 Oakwood Road, Lake Zurich, IL 60047, 1-800-432-ECHO (3246).

### SAFETY

### Manual Safety Symbols and Important Information

Throughout this manual and on the product itself, you will find safety alerts and helpful, informational messages preceded by symbols or key words. The following is an explanation of those symbols and key words and what they mean to you.

## 

The safety alert symbol accompanied by the word "DANGER" calls attention to an act or condition which WILL lead to serious personal injury or death if not avoided.

## **WARNING**

The safety alert symbol accompanied by the word "WARNING" calls attention to an act or condition which CAN lead to serious personal injury or death if not avoided.

## **CAUTION**

The safety alert symbol accompanied by the word "CAUTION" calls attention to an act or condition which might lead to minor or moderate personal injury if not avoided.

## NOTICE

The enclosed message provides information necessary for the protection of the unit.

Note: This enclosed message provides tips for use, care and maintenance of the unit.

CIRCLE AND SLASH SYMBOL

This symbol means the specific action shown is prohibited. Ignoring these prohibitions can result in serious or fatal injury.

### International Symbols

Note: Not all symbols will appear on your unit.

### Personal Condition and Safety Equipment

## WARNING

Cancer and Reproductive Harm www.P65Warnings.ca.gov

The muffler or catalytic muffler and surrounding cover may become extremely hot. Always keep clear of exhaust and muffler area, otherwise serious personal injury might occur.

## **WARNING**

Users of this product risk injury to themselves and others if the unit is used improperly and/or safety precautions are not followed. Proper clothing and safety gear must be worn when operating unit.

#### **Physical Condition**

Your judgment and physical dexterity may not be good:

- If you are tired or sick
- · If you are taking medication
- · If you have taken alcohol or drugs

Operate unit only if you are physically and mentally well.

#### Eye Protection

## WARNING

- Eye protection that meets ANSI Z87.1 or CE requirements must be worn whenever you operate the unit.
- For additional safety, a full-face shield can be worn over safety glasses or goggles to provide protection from sharp branches or flying debris.

#### Hand Protection

Wear sturdy, no-slip, rubber work gloves to improve your grip on the handles. Gloves also provide protection against cuts and scratches, cold environments, and reduce the transmission of machine vibration to your hands.

#### **Hearing and Ear Protection**

ECHO recommends wearing personal protective equipment whenever unit is used.

#### **Breathing Protection**

Operators who are sensitive to dust or other common airborne allergens may need to wear a dust mask to prevent inhaling these materials while operating unit. Dust masks can provide protection against dust, plant debris, and other plant matter such as pollen. Make sure the mask does not impair your vision, and replace the mask as needed to prevent air restrictions.

#### **Proper Clothing**

Wear snug-fitting, durable clothing:

- · Pants should have long legs, shirts should have long sleeves.
- · DO NOT WEAR SHORTS.
- DO NOT WEAR TIES, SCARVES, JEWELRY, or clothing with loose or hanging items that could become entangled in moving parts or surrounding growth.
- · Keep clothing buttoned or zipped, and keep shirt tails tucked in.
- · Wear sturdy work shoes with nonskid rubber soles.
- DO NOT WEAR OPEN TOED SHOES.
- DO NOT OPERATE UNIT WITH BARE FEET.

Keep long hair away from engine and air intake. Retain hair with cap or net.

Heavy protective clothing can increase operator fatigue, which may lead to heat stroke. Schedule heavy work for early morning or late afternoon hours when temperatures are cooler.

## WARNING

The components of this machine generate an electromagnetic field during operation, which can interfere with some pacemakers. To reduce the risk of serious or fatal injury, persons with pacemakers should consult with their physician and the pacemaker manufacturer before operating this machine. In the absence of such information, ECHO <u>does not</u> <u>recommend</u> the use of this machine by anyone who has a pacemaker.

#### **Extended Operation and Extreme Conditions**

## 

Prolonged exposure to cold and/or vibration can result in injury. Read and follow all safety and operation instructions to minimize risk of injury. Failure to follow instructions can result in painful wrist/hand/arm injuries.

It is believed that a condition called Raynaud's Phenomenon, which affects the fingers of certain individuals, may be brought about by exposure to vibration and cold. Exposure to vibration and cold may cause tingling and burning sensations, followed by loss of color and numbness in the fingers. The following precautions are strongly recommended, because the minimum exposure, which might trigger the ailment, is unknown.

- Keep your body warm, especially the head, neck, feet, ankles, hands, and wrists.
- Maintain good blood circulation by performing vigorous arm exercises during frequent work breaks, and also by not smoking.
- Limit the hours of operation. Try to fill each day with jobs where operating the unit or other hand-held power equipment is not required.
- If you experience discomfort, redness, and swelling of the fingers followed by whitening and loss of feeling, consult your physician before further exposing yourself to cold and vibration.

#### Repetitive Stress Injuries (RSI)

It is believed that overusing the muscles and tendons of the fingers, hands, arms, and shoulders may cause soreness, swelling, numbness, weakness, and extreme pain in those areas. Certain repetitive hand activities may put you at a high risk for developing a Repetitive Stress Injury (RSI). An extreme RSI condition is Carpal Tunnel Syndrome (CTS), which could occur when your wrist swells and squeezes a vital nerve that runs through the area. Some believe that prolonged exposure to vibration may contribute to CTS. CTS can cause severe pain for months or even years.

To reduce the risk of RSI/CTS, do the following

- · Avoid using your wrist in a bent, extended, or twisted position. Instead try to maintain a straight wrist position. Also, when grasping, use your whole hand, not just the thumb and index finger.
- Take periodic breaks to minimize repetition and rest your hands.
- · Reduce the speed and force with which you do the repetitive movement.
- · Do exercises to strengthen the hand and arm muscles.

· Immediately stop using all power equipment and consult a doctor if you feel tingling, numbness, or pain in the fingers, hands, wrists, or arms. The sooner RSI/CTS is diagnosed, the more likely permanent nerve and muscle damage can be prevented.

## DANGE:

All over head electrical conductors and communications wires can have electricity flow with high voltages. This unit is not insulated against electrical current. Never touch wires directly or indirectly, otherwise serious injury or death can result.

Do not operate this product indoors or in inadequately ventilated areas. Engine exhaust contains poisonous emissions and can cause serious injury or death.

X7732275404

#### **Read the Manuals**

• Provide all users of this equipment with literature for instructions on Safe Operation.

#### **Clear the Work Area**

- Always clear the work area of foreign objects such as rocks, broken glass, nails, wire, or string, and check for any hidden hazards. Spectators and fellow workers must be warned, and children and animals prevented from coming nearer than 15 m (50 ft.) while the unit is in use.
- Outside the 15 m (50 ft.) zone, there is still a risk of injury from thrown objects.
- · Bystanders should be encouraged to wear eye protection.
- · If you are approached, stop the engine and cutting attachment.

#### Keep a Firm Grip

• Always hold throttle handle and support handle with thumbs and fingers tightly encircling the handles.

#### Keep a Solid Stance

- Maintain footing and balance at all times. Do not stand on slippery, uneven or unstable surfaces. Do not work in odd positions or on ladders. Do not over reach.
- · Keep cutting attachment below waist.
- · Keep all body parts away from rotating cutting attachment

#### **Avoid Hot Surfaces**

 Keep exhaust area clear of flammable debris. Avoid contact during and immediately after operation.

### Equipment

## A WARNING

Use only approved attachments. Serious injury may result from the use of a non-approved attachment combination. ECHO Incorporated will not be responsible for the failure of cutting devices, attachments or accessories which have not been tested and approved by ECHO Incorporated. Read and comply with all safety instructions.

- Do not attempt to modify this product. Serious injury can result from the use of any modified product.
- Check unit for loose or missing nuts, bolts, and screws. Tighten or replace as needed.
- Inspect shield for damage and ensure that shield is properly installed, and that the cut-off knife is securely in place. Replace if either is damaged or missing.
- Check that the cutting attachment is firmly attached and in safe operating condition.
- Manufacturer recommended flexible non-metallic line is installed in the trimmer head.
- Assure that throttle trigger, throttle trigger lockout, and stop switch all work properly.
- Check that handle and harness (if included) are installed and adjusted for safe, comfortable operation. See Assembly Section for proper adjustment.

## **WARNING**

Moving parts can amputate fingers or cause severe injuries. Keep hands, clothing and loose objects away from all openings.

- ALWAYS stop engine, disconnect spark plug, and make sure all moving parts have come to a complete stop before assembling unit, removing obstructions, clearing debris, or servicing unit.
- Do not connect spark plug lead to spark plug until unit is ready for use.
- DO NOT start or operate unit unless all guards and protective covers are properly assembled to unit.
- NEVER reach into any opening while the engine is running. Moving parts may not be visible through openings.

- Position wiring safely to prevent snagging, separation of connectors, or breakage during operation. Gather excess wire, and secure with wiring clamp if provided on equipment, or tuck behind the air filter area. Do not place wiring directly against hot engine components.
- Check wiring and connectors for nicks, cuts, exposed wire, or other damage, and repair or replace as needed. Exposed wire or connectors can cause shocks, sparks, and risk of fire or explosion, resulting in serious injury.
- Check wire terminals for secure connections.

### A WARNING

Periodically Check fuel system (fuel lines, vent, grommet, fuel tank, and fuel cap) for leaks especially if the unit is dropped. If damage or leaks are found, do not use unit, otherwise serious personal injury or property damage may occur. Have unit repaired by an authorized servicing dealer before using.

# EMISSION CONTROL (EXHAUST & EVAPORATIVE)

### **EPA Emissions Control Information**

The emission control system for the engine is EM (engine modification) and, if the second to last character of the Engine Family on the Emission Control Information label (see example) is "B", "C", "K", or "T", the emission control system is EM and TWC (3-way catalyst). The fuel tank/fuel

line emission control system is EVAP (evaporative emissions).

An Emission Control Label is located on the engine. (This is an EXAMPLE ONLY, information on label varies by engine FAMILY).

#### Product Emission Durability (Emission Compliance Period)

The 50 or 300 hour emission compliance period is the time span selected by the manufacturer certifying the engine emissions output meets applicable emissions regulations, provided that approved maintenance procedures are followed as listed in the Maintenance Section of this manual.

### DESCRIPTION

Locate the safety decal(s) or etching(s) on your unit. Make sure they are legible, and that you understand and follow the instructions. If any cannot be read, replacements can be ordered from your ECHO dealer. Images shown below are for example only. Those on your unit might appear slightly different

- 1. Spark Plug
- 2. Top Guard
- 3. Recoil Starter / Handle
- 4. Spark Arrester Muffler or Spark Arrester Muffler with Catalyst
- 5. Fuel Tank
- 6. Fuel Tank Cap
- 7. Air Cleaner
- 8. Choke Lever
- 9. Purge Bulb
- 10. Power Head
- 11. Throttle Handle For Right Hand
- 12. Stop Switch
- 13. Throttle Trigger
- 14. Support Handle For Left Hand
- 15. Drive Shaft Assembly
- 16. Debris Shield with Cut-Off Knife
- 17. Cut-Off Knife
- 18. Speed Feed® 400 Head

### CONTENTS

The ECHO product you purchased has been factory pre-assembled for your convenience. Due to packaging restrictions, some assembly may be necessary.

After opening the carton, check for damage. Immediately notify your retailer or ECHO Dealer of damaged or missing parts. Use the contents list to check for missing parts.

- 1 Power Head / Drive Shaft Assembly
- 1 Quick Start Guide
- 1 Warranty Statement
- 1 Shield Assembly

### ASSEMBLY

### Shield Installation

Parts required: Shield Assembly.

Cut-off knife on debris shield has sharp edges. Avoid contact when installing or removing line head.

Wear Gloves or personal injury may result:

- Cut-off knife is sharp.
- Gear case and surrounding area may be hot.
- 1. Remove wing nut (A), washer (B), and bolt (C).
- 2. Snap the shield over the bearing housing.
- 3. Install bolt (C), washer (B), and wing nut (A).

### Support Handle

- Note: Label (A) shows minimum spacing for Support Handle location.
- Note: Support Handle is preinstalled. Repositioning and tightening is all that is required.

### GT-225SF

### OPERATION

 Position Support Handle (A) in comfortable operating position and tighten wing nut (B). The cutting attachment should be 5 - 7.5 cm (2 - 3 in.) above the ground and as level as possible.

### OPERATION

## WARNING

Moving parts can amputate fingers or cause severe injuries. Keep hands, clothing and loose objects away from all openings. Always stop engine, disconnect spark plug, and make sure all moving parts have come to a complete stop before removing obstructions, clearing debris, or servicing unit.

## WARNING

Engine exhaust IS HOT, and contains Carbon Monoxide (CO), a poison gas. Breathing CO can cause unconsciousness, serious injury, or death. Exhaust can cause serious burns. ALWAYS position unit so that exhaust is directed away from your face and body.

## WARNING

Operation of this equipment may create sparks that can start fires around dry vegetation. This unit is equipped with a spark arrester to prevent discharge of hot particles from the engine. Metal cutters can also create sparks if the cutter strikes rocks, metal, or other hard objects. Contact local fire authorities for laws or regulations regarding fire prevention requirements.

#### Fuel

Diesel fuels and alternative fuels, such as E-15 (15% ethanol), E-85 (85% ethanol) or any fuels not meeting ECHO requirements are NOT approved for use in ECHO 2-stroke gasoline engines. Use of diesel or alternative fuels can cause performance problems, loss of power, overheating, fuel vapor lock, and unintended machine operation, including, but not limited to, improper clutch engagement. Diesel or alternative fuels can also cause premature deterioration of fuel lines, gaskets, carburetors and other engine components.

#### **Fuel Requirements**

**Gasoline** - Use fresh (purchased within the last 30 days from the pump) 89 Octane [R+M/2] (mid grade or higher) gasoline known to be good quality. Gasoline may contain up to 10% Ethanol (grain alcohol) or 15% MTBE (methyl tertiary-butyl ether). Gasoline containing methanol (wood alcohol) is **NOT** approved. Use of ECHO branded fuel is recommended to extend engine life in all air-cooled 2-stroke and 2/4-stroke hybrid engines.

**Two Stroke Oil** - A two-stroke engine oil, such as ECHO branded 2-stroke oils, meeting ISO-L-EGD (ISO/CD 13738) and J.A.S.O. <u>FD</u> Standards must be used. ECHO branded 2-stroke oils meet these standards. Engine problems due to inadequate lubrication caused by failure to use an ISO-L-EGD (ISO/CD 13738) and J.A.S.O. M345-<u>FD</u> certified oil will void the two-stroke engine warranty.

### 

2-Stroke engine oil contains petroleum distillates and other additives that may be harmful if swallowed. Heated oil can release vapors that can cause flash fire, or ignite with explosive force. Read and follow the oil manufacturer's instructions, and observe all safety warnings and precautions for handling flammable liquids. For more detailed safety and first aid information, visit www.echo-usa.com for a copy of the Material Safety Data Sheet.

- ◆ KEEP OUT OF REACH OF CHILDREN.
- If swallowed, do not induce vomiting. CALL PHYSICIAN OR A POISON CONTROL CENTER IMMEDIATELY.
- WEAR SAFETY GLASSES when mixing or handling.

- AVOID repeated or prolonged skin contact.
- AVOID inhaling oil mists or vapors.

## NOTICE

ECHO branded 2-stroke oils may be mixed at 50:1 ratio for application in all ECHO engines sold in the past regardless of ratio specified in those manuals.

#### Handling Fuel

## **DANGER**

Fuel is VERY flammable. Use extreme care when mixing, storing or handling, or serious personal injury will result.

- Use an approved fuel container. Mark fuel containers as containing 2-stroke mixture fuel.
- DO NOT smoke near fuel.
- ◆ DO NOT allow flames or sparks near fuel.
- Fuel tanks/cans may be under pressure. Always loosen fuel caps slowly allowing pressure to equalize.
- ◆ NEVER refuel a unit when the engine is HOT or RUNNING!
- DO NOT fill fuel tanks indoors. ALWAYS fill fuel tanks outdoors over bare ground.
- DO NOT overfill fuel tank. Wipe up spills immediately.
- Securely tighten fuel tank cap and close fuel container after refueling.
- Inspect for fuel leakage. If fuel leakage is found, do not start or operate unit until leakage is repaired.
- Use caution when handling fuel. Mix and pour fuel outdoors where there are no sparks and flames. Slowly remove the fuel cap only after stopping the engine and allowing the unit to cool. Do not smoke while fueling or mixing fuel. Move the unit at least 10 feet (3 m) from the fueling point before starting the engine.

## 

Gasoline vapor is heavier than air, and can travel along the ground to nearby sources of ignition such as electrical motors, pilot lights, and hot or running engines. Vapors ignited by an ignition source can flash back to the fuel container, resulting in an explosion, fire, serious or fatal injuries, and extensive property damage.

#### Mixing Instructions

## NOTICE

Stored fuel ages. Do not mix more fuel than you expect to use in 30 days, 90 days when a fuel stabilizer is added.

- Fill an approved fuel container with half of the required amount of gasoline.
- 2. Add the proper amount of 2-stroke oil to gasoline.
- 3. Close container and shake to mix oil with gasoline.
- 4. Add remaining gasoline, close fuel container, and remix.

Fuel to Oil Mix – 50:1 Ratio			
US		Metric	
Gas	Oil	Gas	Oil
gal.	fl.oz.	L	СС
1	2.6	5	100
2	5.2	10	200
5	13	25	500

## NOTICE

Spilled fuel is a leading cause of hydrocarbon emissions. Some locations may require the use of automatic fuel shut-off containers to reduce fuel spillage.

**Storage** - Fuel storage laws vary by locality. Contact your local government for the laws affecting your area. As a precaution, store fuel in an approved, airtight container. Store in a well-ventilated, unoccupied building, away from sparks and flames.

• Empty the fuel tank prior to storing the unit. Return unused fuel to an approved fuel storage container.

## NOTICE

Stored two-stroke fuel can separate. ALWAYS shake fuel container thoroughly before each use.

Used oil and gasoline, and soiled towels are hazardous waste materials. Disposal laws vary by locality.

### Starting Cold Engine

The attachment will operate immediately when the engine starts, and could result in possible serious injury. Keep movable parts of the attachment away from objects that could become entangled or thrown, and surfaces that could cause loss of control.

1. Stop Switch

Move stop switch (A) away from the STOP position.

- Choke Move choke (B) to COLD START (|--|) (closed) position.
- 3. Purge Bulb

Pump purge bulb (C) until fuel is visible and flows freely in the clear fuel tank return line. Pump bulb an additional 4 or 5 times.

### OPERATION

#### 4. Recoil Starter

Lay the unit on a flat area and keep movable attachment parts clear of all obstacles. Firmly grasp throttle handle with left hand and fully depress throttle trigger to wide open position. Rapidly pull recoil starter

handle/rope (D) until engine fires (or maximum five pulls).

5. Choke

After engine fires (or 5 pulls), move choke (B) to the RUN  $(|\downarrow|)$  (open) position. Firmly grasp throttle handle with left hand and fully depress throttle trigger to wide open position. Pull starter handle/rope until engine starts and runs. Release throttle trigger and allow unit to warm up at idle for several minutes.

- Note: If engine does not start with choke in "RUN" position after 5 pulls, repeat instructions 2 5.
- 6. Throttle Trigger

After engine warm-up, grip throttle handle and support handle. Gradually depress throttle trigger to increase engine RPM to operating speed.

### Starting Warm Engine

The starting procedure is the same as Cold Start except DO NOT close the choke, and do not depress throttle trigger to wide open position.

## A WARNING

## The attachment should not move at idle, otherwise serious personal injury may result.

- Note: If attachment moves, readjust carburetor according to "Carburetor Adjustment" instructions in this manual or see your ECHO Dealer.
- 1. Stop Switch

Move stop switch (A) away from the STOP position.

### GT-225SF

### OPERATION

2. Purge Bulb

Pump purge bulb (C) until fuel is visible and flows freely in the clear fuel tank return line. Pump bulb an additional 4 or 5 times.

3. Recoil Starter

Lay the unit on a flat area and keep movable attachment parts clear of all obstacles. Firmly grip throttle handle with left hand. Rapidly pull recoil starter handle/rope (D) until engine fires.

Note: If engine does not start after 5 pulls, use Cold Start Procedure.

### **Stopping Engine**

If engine does not stop when stop switch is moved to STOP position, close choke - COLD START position - to stall engine. Have your ECHO dealer repair stop switch before using unit again.

1. Throttle

Release throttle and allow engine to return to idle before shutting off engine.

## WARNING

# The cutting attachment will continue to rotate even after the throttle is released, maintain control of the unit until it has come to a complete stop

2. Stop Switch

Move stop switch (A) to STOP position.

### Applications

## 

#### Do not install blades on GT (Curved Shaft) trimmers.

### **Operating Techniques - Nylon Line Head**

Nylon line heads may be used for trimming, scything, edging, and scalping of grass and light weeds.

## NOTICE

Units with Speed Feed<sup>®</sup> line heads ONLY: To advance trimmer line, tap trimmer head against the ground while the head is turning at normal operating speed.

#### Trimming

Feed the spinning line into the material to be cut. Tilt cutting head to the left while cutting to direct debris away from the operator.

#### Scything

Scything - Swing the cutting head in a level arc, gradually feeding the line into the material being cut. Move forward with each arc to cut a swath. Width of cutting swath depends on arc. Use a larger arc for a wider swath, or a smaller arc for a narrow swath. Keep line head tilted to direct cutting debris forward or away from you.

#### **Edging and Scalping**

Both of these are done with the nylon line cutting head tilted at a steep angle. Scalping is removing top growth, leaving the earth bare. Edging is trimming the grass back where it has spread over a pavement or driveway. During both edging and scalping, hold the unit at a steep angle in a position where the debris, and any dislodged dirt and stone, will not come back towards you even if it ricochets off the hard surface.

#### General

- Debris flows in direction of line head rotation. Change line head position to assure debris flow is directed away from operator.
- · Keep cutting line away from wire fences to avoid entanglement.
- · Operate trimmer only with cutting head below knee height.

### MAINTENANCE

## **WARNING**

Moving parts can amputate fingers or cause severe injuries. Keep hands, clothing and loose objects away from all openings. Always stop engine, disconnect spark plug, and make sure all moving parts have come to a complete stop before removing obstructions, clearing debris, or servicing unit. Allow the unit to cool before performing maintenance or adjustments. Wear gloves to protect hands from sharp edges and hot surfaces.

Operating a poorly maintained unit can result in serious injuries to operator or bystanders. Always follow all maintenance instructions as written, otherwise serious personal injury can result.

Your unit is designed to provide many hours of trouble free service. Regular scheduled maintenance will help your unit achieve that goal. If you are unsure or are not equipped with the necessary tools, we recommend that you take your unit to a Servicing Dealer for maintenance. To help you decide whether you want to DO-IT-YOURSELF or have the Dealer do it, each maintenance task has been graded. If the task is not listed, see your Dealer for repairs.

## NOTICE

The use of emission control components other than those specifically designed for this unit is a violation of federal law.

### MAINTENANCE

#### **Skill Levels**

Level 1 = Easy to do. Common tools may be required.

Level 2 = Moderate difficulty. Some specialized tools may be required.

Level 3 = See your dealer.

Click HERE or go to http://www.echo-usa.com/products/maintenance-kit

or

HERE https://www.shindaiwa-usa.com/you-can.aspx

### **Maintenance Intervals**

COMPONENT/SYSTEM	MAINTENANCE PROCEDURE	REQUIRED SKILL LEVEL
Daily or Before Use		
Air Filter	Inspect/Clean *	
Choke Shutter		1
Fuel System	Inspect*	
Cooling System	Inspect/Clean	2
Recoil Starter Rope	Inspect/Clean *	1
Screws/Nuts/Bolts	Inspect/Tighten/Replace *	
Every Refuel		
Fuel System	Inspect <sup>*</sup>	1
3 Months		
Air Filter	Replace *	
Fuel Filter	Inspect *	1
Fuel Cap Gasket	lispeci	
Spark Plug	Inapact/Clean/Paplace *	
Muffler Spark Arrester	Inspect/Clean/Replace *	
Cylinder Exhaust Port	Inspect/Clean/De-carbon	2
Drive Shaft (Flex Cable Models)	Grease <sup>1</sup>	
Gear Housing	None	-

COMPONENT/SYSTEM	MAINTENANCE PROCEDURE	REQUIRED SKILL LEVEL
Yearly		
Fuel Filter	Inspect/Replace *	1
Fuel Cap Gasket	Replace *	1

**IMPORTANT NOTE** - Time intervals shown are maximum. Actual use and your experience will determine the frequency of required maintenance.

#### MAINTENANCE PROCEDURE NOTES:

<sup>1</sup>Apply lithium based grease every 25 hours of use.

\* Replacement is recommended based on the finding of damage or wear during inspection.

### Air Filter

#### Level 1.

Parts required: Tune-Up Kit.

- 1. Close choke (COLD START position). This prevents dirt from entering the carburetor throat when the air filter is removed. Brush accumulated dirt from air cleaner area.
- 2. Remove air filter cover. Brush dirt from inside cover.
- Replace filter if it is damaged, fuel soaked, very dirty, or the rubber sealing edges are deformed.
  - Lightly brush debris from filter.
  - Soak heavily soiled filters in water/detergent solution to loosen dirt, then brush lightly.

- Rinse with clean water and allow to dry completely before reuse.
- 4. Install air filter in air filter case.
- 5. Install air filter cover.

### Fuel Filter

#### Level 1.

Parts required: Tune-Up Kit.

## 

Fuel is VERY flammable. Use extreme care when mixing, storing or handling, or serious personal injury may result.

1. Use a clean rag to remove loose dirt from around fuel cap and empty fuel tank.

## NOTICE

Do not damage fuel line while removing fuel filter from tank or line.

- 2. Pull the fuel filter from the tank.
- Do not remove the wire coil clamp to remove the fuel filter. Pinch the fuel filter with the fingers on one hand and the fuel line with the other hand. Pull and twist slightly to separate.

- 4. Install the new filter with the reverse action.
- Note: Federal EPA regulations require all model year 2012 and later gasoline powered engines produced for sale in the United States to be equipped with a special low permeation fuel supply hose between the carburetor and fuel tank. When servicing model year 2012 and later equipment, only fuel supply hoses certified by EPA can be used to replace the original equipment supply hose. Fines up to \$37,500 may be enforced for using a non-certified replacement part.

### Spark Plug

#### Level 2.

Parts required: Tune-Up Kit.

Use only NGK BPM8Y spark plug (BPMR8Y in Canada) otherwise severe engine damage may occur.

- Remove spark plug and check 1. for fouling, worn and rounded center electrode.
- 2. Clean the plug or replace with a new one. DO NOT sand blast to clean. Remaining sand will damage engine.
- 3. Adjust spark plug gap by bending outer electrode.

Tighten spark plug to 130-170 kgf•cm (112-150 lbf•in). 4.

### Cooling System

Level 2.

## NOTICE

To maintain proper engine operating temperatures, cooling air must pass freely through the cylinder fin area. This flow of air carries combustion heat away from the engine.

Overheating and engine seizure can occur when:

- Air intakes are blocked. preventing cooling air from reaching the cylinder.
- · Dust and grass build up on the outside of the cylinder. This build up insulates the engine and prevents the heat from leaving.

Removal of cooling passage

blockages or cleaning of cooling fins is considered "Normal Maintenance." Any failure attributed to lack of maintenance is not warranted.

X7732275404

### MAINTENANCE

- 1. Remove spark plug lead.
- 2. Close choke (COLD START [|+] position). This prevents dirt from entering the carburetor throat when the air filter is removed. Remove air cleaner cover (A).
- 3. Remove engine cover (B).

## NOTICI

DO NOT use a metal scraper to remove dirt from the cylinder fins.

- 4 Use a brush to remove dirt from the cylinder fins.
- 5. Remove ignition wires from clip for cleaning.

- 6. Remove grass and leaves from the grid between the recoil starter and fuel tank.
- 7. Assemble components in reverse order.

X7732275404

### Exhaust System

#### **Spark Arrester Screen**

#### Level 2.

Parts required: Spark Arrester Screen, Gasket.

- 1. Remove spark plug lead and engine cover.
- 2. Place piston at Top Dead Center (TDC) to prevent carbon/dirt from entering cylinder.
- Remove spark arrester screen cover (C), gasket (D), and screen (E), from muffler body.
- 4. Clean carbon deposits from muffler components.
- Note: When cleaning carbon deposit, be careful not to damage the catalytic element inside muffler.
- 5. Replace screen if it is cracked, plugged, or has holes burned through.
- 6. Assemble components in reverse order.

#### Exhaust Port Cleaning

#### Level 2.

Parts required: Heat Shield (as needed).

- 1. Remove spark plug lead from spark plug, and remove engine cover.
- Place piston at top dead center. Remove muffler (A) and heat shield (B).

 Use a wood or plastic scraping tool to clean deposits from cylinder exhaust port (C).

## NOTICE

Never use a metal tool to scrape carbon from the exhaust port. Do not scratch the cylinder or piston when cleaning the exhaust port. Do not allow carbon particles to enter the cylinder.

- 4. Inspect heat shield, and replace if damaged.
- 5. Install heat shield and muffler.
- 6. Tighten muffler mounting bolts (or nuts) to 90-110 kgf•cm (80-95 lbf•in).
- 7. Install engine cover and attach spark plug lead.
- 8. Start engine, and warm to operating temperature.
- 9. Stop engine, and re-tighten mounting bolts (or nuts) to specifications.

### **Carburetor Adjustment**

Level 2.

#### Engine Break-In

New engines must be operated a minimum duration of two tanks of fuel break-in before carburetor adjustments can be made. During the break-in period your engine performance will increase and exhaust emissions will stabilize. Idle speed can be adjusted as required.

#### **High Altitude Operation**

This engine has been factory adjusted to maintain satisfactory starting and durability performance up to 335 m (1,100 ft.) above sea level (ASL) (96.0 kPa). To maintain proper engine operation and emission compliance above 335 m (1,100 ft.) ASL the carburetor <u>may</u> need to be adjusted by an authorized service dealer.

## NOTICE

*If the engine is adjusted for operation above 335 m (1,100 ft.) ASL, the carburetor must be re-adjusted when operating the engine below 335 m (1,100 ft.) ASL, otherwise severe engine damage may result.* 

Note: Every unit is run at the factory and the carburetor is set in compliance with emission regulations. Carburetor adjustments, other than idle speed, must be performed by an authorized dealer.

## 

- The cutting attachment may be moving during carburetor adjustments.
- Wear your protective equipment and observe all safety instructions.
- For units equipped with a clutch, be sure the cutting attachment stops moving when the engine idles.
- When the unit is turned off, make sure the cutting attachment has stopped before the unit is set down.
- Check idle speed and reset if necessary. If a tachometer is available, idle speed screw (A) should be set to the specifications found on "Specifications" page of this manual. Turn idle screw (A) clockwise to increase idle speed; counterclockwise to decrease idle speed.

## WARNING

When carburetor adjustment is completed, the cutting attachment should not move at idle, otherwise serious personal injury may result.

#### Lubrication

#### Level 1.

Parts required: Lithium-based Grease.

- 1. Remove shield.
- Loosen bearing housing locating screw (A), at the top of the housing, loosen mounting screw (B) and remove gear case from drive housing.
- Pull the flexible drive shaft (C) from the drive housing, wipe clean and apply 15 ml (0.5 oz.) of grease.
- Slide the flexible drive shaft back in the drive housing being careful not to get dirt on the flexible drive shaft.

5. Install the bearing housing and shield.

### Nylon Line Replacement

## 

Wear gloves or personal injury may result:

- Cut-off knife is sharp.
- ◆ Gearcase and surrounding area may be hot.

Never use wire or wire-rope that can break off and become a dangerous "projectile". Serious injury can occur.

### GT-225SF

- Cut one piece of line to recommended length.
   2.0 mm (0.080 in.) diameter 6 m (20 ft.).
   2.4 mm (0.095 in.) diameter 6 m (20 ft.).
- 2. Align arrows on top of knob with openings in eyelets.

 Insert one end of trimmer line into an eyelet, and push line equal distance through trimmer head.

 Hold trimmer head while turning knob clockwise to wind line onto spool until about 13 cm (5 in.) of each line remains exposed.

Trimmer head is now fully loaded and ready for operation.

# NOTICE

When the wear indicators located at the bottom of the Speed-Feed<sup>®</sup> head are worn smooth, or if holes appear, replacement of the cover or the entire Speed-Feed<sup>®</sup> head is required.

### Nylon Line Head Disassembly Instructions

- Note: For normal use, Speed Feed<sup>®</sup> head disassembly is not necessary. However, if circumstances require disassembly, follow these instructions.
- Press top of locking tabs (A) on both sides of Speed Feed<sup>®</sup> head to release cover (B) from eyelet carrier (C).
- 2. Remove cover from eyelet carrier.

## TROUBLESHOOTING

	ENGINE PRO	DBLEM TROU	BLESHOOTING (	CHART
Problem	Check	Status	Cause	Remedy
	Fuel at carburetor	No fuel at carburetor	Fuel strainer or fuel line obstructed	Clean or replace See your dealer
		No fuel at cylinder	Carburetor	See your dealer
				OPEN choke
Engine starts hard	Fuel at cylinder	Muffler wet with fuel	Fuel mixture too rich	Clean or replace air filter
or		with tuel	TICH	Adjust carburetor
<b>F</b> acility of				See your dealer
Engine does not start	Spark at end of plug		STOP switch OFF - Electrical problem -	Turn switch to ON
	wire		Interlock switch	See your dealer
	Spark at plug	No spark	Incorrect gap - Covered with carbon - Fouled with fuel - Plug	Adjust to 0.65 mm (0.026 in.)
	piug		defective	Clean or replace plug
Engine	Air filter	Air filter dirty	Normal wear	Clean or replace
runs, but dies	Fuel filter	Fuel filter dirty	Contaminants or residue in fuel	Replace filter or replace fuel
or				
Engine does not accelerate properly	Fuel vent	Fuel vent plugged	Contaminated fuel	Clean or replace

### TROUBLESHOOTING

Problem	Check	Status	Cause	Remedy
Engine	Spark plug	Plug dirty or worn	Normal wear	Clean and adjust or replace
runs, but dies	Carburetor	Improper adjustment	Vibration	Adjust
or Engine	Cooling system	Cooling system dirty or plugged	Extended operation in dirty or dusty locations	Clean
does not accelerate properly	Spark arrester screen	Spark arrester screen plugged	Normal wear	Replace
Engine does not crank	N	I/A	Internal engine problem	See your dealer

### 

Fuel vapors are extremely flammable and can cause fire and/or explosion. Never test for ignition spark by grounding spark plug near cylinder plug hole, otherwise serious personal injury can result.

### STORAGE

# **WARNING**

During operation the muffler or catalytic muffler and surrounding cover become hot. Always keep exhaust area clear of flammable debris during transportation or when storing, otherwise serious property damage or personal injury may result.

### Long Term Storage (Over 30 Days)

Do not store your unit for a prolonged period of time (30 days or longer) without performing protective storage maintenance which includes the following:

1. Store unit in a dry, dust free place, out of the reach of children.

# A DANGER

# Do not store in enclosure where fuel fumes may accumulate or reach an open flame or spark.

- 2. Place the stop switch in the "OFF" position.
- 3. Remove accumulation of grease, oil, dirt and debris from exterior of unit.
- 4. Perform all periodic lubrication and services that are required.
- 5. Tighten all the screws and nuts.
- 6. Drain fuel tank completely. Press purge bulb six to seven times to remove remaining fuel from carburetor then drain the tank again. Close choke, start and run the engine until it stops due to lack of fuel.
- Allow engine to cool. Remove the spark plug lead from the spark plug. Remove the spark plug. Pour 7 cc (0.25 oz.) of fresh, clean, two-stroke engine oil into the cylinder through the spark plug hole.
- 8. Pull the recoil starter handle two to three times to distribute the oil inside the engine.
- 9. Observe the piston location through the spark plug hole. Pull the recoil handle slowly until the piston reaches the top of its travel and leave it there.
- 10. Install the spark plug. Connect the spark plug lead to the spark plug.

### **SPECIFICATIONS**

### **SPECIFICATIONS**

For units with the following serial numbers:

U01013001001 - U01013999999 U35813001001 - U35813999999

MODEL	GT-225SF
Length	1,370 mm (53.9 in.)
Width	315 mm (12.4 in.)
Height	540 mm (21.3 in.)
Weight (dry) without Cutter Head	4.1 kg (9.04 lb.)
Engine Type	Air-cooled, two-stroke, single-cylinder gasoline engine
Bore	32.2 mm (1.27 in.)
Stroke	26.0 mm (1.02 in.)
Displacement	21.2 cc (1.29 in. <sup>3</sup> )
Exhaust	Spark arrester muffler or spark arrester muffler with catalyst
Carburetor	Diaphragm with purge pump
Ignition System	Flywheel magneto, capacitor discharge ignition type
Spark Plug	NGK BPM8Y (BPMR8Y in Canada) Gap 0.65 mm (0.026 in.)
Fuel	Mixed (gasoline and two-stroke oil)
Fuel/Oil Ratio	50:1
Gasoline	Use 89 Octane unleaded. Do not use fuel containing methyl alcohol, more than 10% ethyl alcohol or 15% MTBE. Do not use alternative fuels such as E-15 or E-85.
Oil	ISO-L-EGD (ISO/CD 13738) and J.A.S.O. M345- FD, two-stroke, air-cooled engine oil.
Fuel Tank Capacity	420 mL (14.2 US fl. oz.)
Starter System	Automatic rewind starter
Clutch	Centrifugal type
Drive Shaft	6 mm (0.25 in.) flexible shaft
Rotating Direction	Clockwise (viewed from top)

MODEL	GT-225SF
Cutter Head	Speed Feed $^{\textcircled{\sc 8}}$ Nylon line head, Line capacity 6.0 m (20 ft.) .080 or .095 in. line
Handle	Front - D-Loop type with plastic grip
nandie	Rear - Plastic grip with throttle trigger and switch
Shoulder Harness	Optional
Idle Speed	3,000 RPM
Clutch Engagement Speed	4,300 RPM
Wide Open Throttle Speed	7,800 RPM

For units with the following serial numbers:

#### U67013001001 - U67013999999 U74213001001 - U74213999999

MODEL	GT-225SF
